Price 6d. net

EXPLANATORY STATEMENT

The figures relating to Births and Deaths are tabulated from Returns furnished by the Local Registrars, and those relating to Marriages from Returns received from the Clergy, Authorised Persons, Registrars of Marriages, &c.

For the purposes of the Annual Review, Births and Deaths will continue to be assigned by place of residence. The deaths of non-civilians are excluded from tables IV, V, VI, IX, X and XI.

In the tables in this Return relating to the current quarter births and deaths are classified by place of occurrence.

Meteorological information is suspended until further notice.

The figures relating to Notifications of Infectious Diseases are summarised from those published in the Weekly Returns, adjusted in respect of any returns or corrections received too late for insertion in that series.

Note.—The returns for the quarters ending 30th June and 31st December contain lists of the change of boundaries of administrative areas during the six months ending on these dates while summaries of certain figures for the year are published in the December and March quarter issues (see Tables IX–XII).

QUARTERLY DEATHS BY CAUSE DURING 1939-1941.

An appendix table (pages 5 and 8) shows the deaths of males and females from 36 selected causes, registered during each quarter of the years 1939, 1940 and 1941. This series is to be continued quarter by quarter in future Returns. Corresponding figures for each quarter of 1938 were given in the Return for the March quarter of 1941.

NOTES ON THE FIRST QUARTER OF 1942

ENGLAND AND WALES.

Births.

The birth rate based upon the total population of England and Wales as at Mid-1939, was 15.5 per 1,000 compared with 14.4 in the first quarter of 1941. This was the highest rate for a first quarter since 1931. In the five years prior to 1941 the average rate for the first quarters was 14.9.

Of the births registered 81,813 were males and 76,388 females, a proportion of 1,071 males to 1,000 females; the average for the 10 preceding first quarters being 1,056.

The number of illegitimate births, included in the total, was 8,200 which was 1,483 more than in the first quarter of 1941.

The 5,636 stillbirths represent 3.5 per cent. of the total births registered.

Deaths.

The death rate based upon the Mid-1939 population was 14.8 per thousand compared with 17.5 in the first quarter of 1941. In the five years prior to 1941 the average rate for the first quarters was 16.0.

Infant mortality was 61 per 1,000 live births, 15 below the average of the 10 preceding first quarters and the lowest rate ever recorded in a first quarter. The deaths totalled 9,697. In the previous four quarters the rates were 75, 60, 44 and 57. The diarrhoea death rate under 2 years of age was 4.9 per 1,000 live births (778 deaths) compared with 5.3, 4.6, 4.9 and 5.6 in the four preceding quarters.

There were no cases of small-pox notified and no deaths registered during the quarter.

Natural Increase or Decrease.

The births registered exceeded the deaths by 7,131. Decreases were recorded in the first quarters of 1939, 1940 and 1941 of 850, 50,838 and 31,610 respectively.

Marriages.

The 176,444 persons married in the quarter were 15,006 more than in the first quarter of 1941, and were 44,770 higher than the average for the first quarters of the five years prior to 1941.

UNITED KINGDOM AND EIRE.

201,178 births and 187,782 deaths were registered in the quarter, representing a natural increase of 13,396. The number of persons married is not yet available. (See the Returns published by the respective Registrars-General for Scotland, Northern Ireland and Eire.)

(a) Provisional.

(b) Provisional rates based upon Mid-1939 population. Changes in the total population since 1939 are not sufficient to invalidate these rates to any serious extent.

(c) Note:—An exceptional number of marriages are celebrated at Easter and the sequence of quarterly marriage totals is significantly influenced by fluctuations, as between the 1st and 2nd quarter, of the position of Easter. The following shows the date of Easter Sunday in each year of record.

1932	1933	1934	1935	1936	1937	1938	1939	1940	1941	1942
27th March	16th April	1st April	21st April	12th April	28th March	17th April	9th April	24th March	13th April	5th April

(d) In addition to these numbers 167 deaths were registered in 1938 and 98 in 1939 which occurred in the Gresford Colliery disaster in 1934.

TABLE III suspended.

† The births and deaths for Edinburgh, Glasgow, Dublin and Belfast are classified according to area of residence. Deaths of non-civilians are included in the figures for Dublin and Belfast but excluded in the case of Edinburgh and Glasgow where deaths from enemy action are also excluded.

Appendix Table.—DEATHS IN ENGLAND AND WALES, including non-civilians, from certain causes in each quarter of 1939, 1940 and 1941 (deaths in 1939 being corrected for the changes in method of classification which came into force in 1940).*

Sex.	Quarter.	1939.	1940.	1941.	1939.	1940.	1941.	1939.	1940.	1941.	1939.	1940.	1941.	1939.	1940.	1941.
		1-2. Typhoid and Paratyphoid fevers.			6. Cerebro-spinal (Meningococcal) Meningitis.			8. Scarlet fever.			9. Whooping Cough.			10. Diphtheria.

EXPLANATORY STATEMENT

The figures relating to Births and Deaths are tabulated from Returns furnished by the Local Registrars, and those relating to Marriages from Returns received from the Clergy, Authorised Persons, Registrars of Marriages, &c.

In this Return births and deaths are classified by place of occurrence. For the purposes of the Annual Review, Births and Deaths will continue to be assigned by place of residence.

The deaths of non-civilians are excluded from tables IV, V and VI.

Meteorological information is suspended until further notice.

The figures relating to Notifications of Infectious Diseases are summarised from those published in the Weekly Returns, adjusted in respect of any returns or corrections received too late for insertion in that series.

Note.—The returns for the quarters ending 30th June and 31st December contain lists of the change of boundaries of administrative areas during the six months ending on these dates (see Table IX) while summaries of certain figures for the year are published in the December and March quarter issues.

QUARTERLY DEATHS BY CAUSE DURING 1940-1942.

An appendix table (pages 5 and 8) shows the deaths of males and females from 36 selected causes, registered during each quarter of the years 1940 and 1941 and March quarter of 1942. This series is to be continued quarter by quarter in future Returns. Corresponding figures for each quarter of 1938 and 1939 were given in the Return for the March quarter of 1941.

NOTES ON THE SECOND QUARTER OF 1942

ENGLAND AND WALES.

Births.

The birth rate based upon the total population of England and Wales as at Mid-1939, was 16.2 per 1,000 compared with 14.3 in the second quarter of 1941. In the five years prior to 1941 the average rate for the second quarters was 15.9.

Of the births registered 86,380 were males and 81,177 females, a proportion of 1,064 males to 1,000 females; the average for the 10 preceding second quarters being 1,053.

The number of illegitimate births, included in the total, was 9,239 which was 846 more than in the second quarter of 1941.

The 5,752 stillbirths represent 3.3 per cent. of the total births registered.

Deaths.

The death rate based upon the Mid-1939 population was 11.3 per thousand compared with 13.6 in the second quarter of 1941. In the five years prior to 1941 the average rate for the second quarters was 11.7.

Of the deaths registered 60,477 were males and 56,357 females, a proportion of 1,073 males to 1,000 females.

Infant mortality was 47 per 1,000 live births, 7 below the average of the 10 preceding second quarters. The deaths totalled 7,820. In the previous four quarters the rates were 60, 44, 57 and 61. The diarrhoea death rate under 2 years of age was 4.3 per 1,000 live births (714 deaths) compared with 4.6, 4.9, 5.6 and 4.9 in the four preceding quarters.

There were no deaths from small-pox registered during the quarter but three cases were notified as occurring in Swindon M.B., Wiltshire.

Natural Increase or Decrease.

The births registered exceeded the deaths by 50,723. The corresponding increases in the second quarters of 1939, 1940 and 1941 were 43,777, 46,980 and 7,228 respectively.

Marriages.

The 201,850 persons married in the quarter were 8,550 less than in the second quarter of 1941, but were 773 higher than the average for the second quarters of the five years prior to 1941.

UNITED KINGDOM AND EIRE.

The numbers of births, deaths and marriages registered in the quarter are not yet available.

(a) Provisional.

(b) Provisional rates based upon Mid-1939 population. Changes in the total population since 1939 are not sufficient to invalidate these rates to any serious extent.

(c) Note:—An exceptional number of marriages are celebrated at Easter and the sequence of quarterly marriage totals is accordingly influenced by fluctuations, as between the 1st and 2nd quarter, of the position of Easter. The following shows the date of Easter Sunday in each year of record.

1932	1933	1934	1935	1936	1937	1938	1939	1940	1941	1942
27th March	16th April	1st April	21st April	12th April	28th March	17th April	9th April	24th March	13th April	5th April

(d) In addition to these numbers 167 deaths were registered in 1938 and 98 in 1939 which occurred in the Gresford Colliery disaster in 1934.

TABLE III suspended.

EXPLANATORY STATEMENT

The figures relating to Births and Deaths are tabulated from Returns furnished by the Local Registrars, and those relating to Marriages from Returns received from the Clergy, Authorised Persons, Registrars of Marriages, &c.

In this Return births and deaths are classified by place of occurrence. For the purposes of the Annual Review, Births and Deaths will continue to be assigned by place of residence.

The deaths of non-civilians are excluded from tables IV, V and VI.

Meteorological information is suspended until further notice.

The figures relating to Notifications of Infectious Diseases are summarised from those published in the Weekly Returns, adjusted in respect of any returns or corrections received too late for insertion in that series.

Note.—The returns for the quarters ending 30th June and 31st December contain lists of the change of boundaries of administrative areas during the six months ending on these dates while summaries of certain figures for the year are published in the December and March quarter issues.

QUARTERLY DEATHS BY CAUSE DURING 1940-1942.

An appendix table (pages 5 and 8) shows the deaths of males and females from 36 selected causes, registered during each quarter of the years 1940 and 1941 and March and June quarters of 1942. This series is to be continued quarter by quarter in future Returns. Corresponding figures for each quarter of 1938 and 1939 were given in the Return for the March quarter of 1941.

NOTES ON THE THIRD QUARTER OF 1942

ENGLAND AND WALES.

Births.

The birth rate, based upon the total population of England and Wales as at Mid-1939, was 16.1 per 1,000 and is the highest third quarter rate recorded since 1930. It compares with 14.1 in the third quarter of 1941. In the five years prior to 1941 the average rate for the third quarters was 15.1.

Of the births registered 86,893 were males and 81,745 females, a proportion of 1,063 males to 1,000 females; the average for the 10 preceding third quarters being 1,052.

The number of illegitimate births, included in the total, was 9,251 which was 970 more than in the third quarter of 1941.

The 5,425 stillbirths represent 3.1 per cent. of the total births registered, the lowest proportion yet recorded.

Deaths.

The death rate based upon the Mid-1939 population was 9.3 per thousand compared with 9.7 in the third quarter of 1941. In the five years prior to 1941 the average rate for the third quarters was 10.0.

Of the deaths registered 50,703 were males and 46,573 females, a proportion of 1,089 males to 1,000 females.

Infant mortality was 40 per 1,000 live births, 5 below the average of the 10 preceding third quarters and equal to the low record reached in 1939. The deaths totalled 6,766. In the previous four quarters the rates were 44, 57, 61 and 47. The diarrhoea death rate under 2 years of age was 5.6 per 1,000 live births (946 deaths) compared with 4.9, 5.6, 4.9 and 4.3 in the four preceding quarters.

There were no deaths from small-pox registered during the quarter but three cases were notified as follows:—

Westminster Met. B., London Ad. Co.	1
Stone R.D., Staffordshire Ad. Co.	1
Liverpool Port Health District	1

Natural Increase or Decrease.

The births registered exceeded the deaths by 71,362. The corresponding increases in the third quarters of 1939, 1940 and 1941 were 57,723, 37,359 and 46,285, respectively.

Marriages.

The 191,426 persons married in the quarter were 17,240 less than in the third quarter of 1941, and were 63,874 lower than the average for the third quarters of the five years prior to 1941. The corresponding rate, namely, 18.3 persons married per 1,000 population, is lower than any third quarter rate recorded since 1926.

UNITED KINGDOM AND EIRE.

216,796 births and 123,223 deaths were registered in the quarter, representing a natural increase of 93,573. The number of persons married is not yet available. (See the Returns published by the respective Registrars-General for Scotland, Northern Ireland and Eire.)

(a) Provisional.

(b) Provisional rates based upon Mid-1939 population. Changes in the total population since 1939 are not sufficient to invalidate these rates to any serious extent.

(c) Note.—An exceptional number of marriages are celebrated at Easter and the sequence of quarterly marriage totals is accordingly influenced by fluctuations, as between the 1st and 2nd quarter, of the position of Easter. The following shows the date of Easter Sunday in each year of record.

1932	1933	1934	1935	1936	1937	1938	1939	1940	1941	1942
27th March	16th April	1st April	21st April	12th April	28th March	17th April	9th April	24th March	13th April	5th April

(d) In addition to these numbers 167 deaths were registered in 1938 and 98 in 1939 which occurred in the Gresford Colliery disaster in 1934.

TABLE III suspended.

TABLE IV.—MARRIAGES, BIRTHS AND CIVILIAN DEATHS (AND DEATHS OF INFANTS UNDER 1 YEAR) registered in the Quarter ended 30th September, 1942.*

EXPLANATORY STATEMENT

The figures relating to Births and Deaths are tabulated from Returns furnished by the Local Registrars, and those relating to Marriages from Returns received from the Clergy, Authorised Persons, Registrars of Marriages, &c.

In this Return births and deaths are classified by place of occurrence. For the purposes of the Annual Review, Births and Deaths will continue to be assigned by place of residence.

The deaths of non-civilians are excluded from tables IV, V, VI and X.

Meteorological information is suspended until further notice.

The figures relating to Notifications of Infectious Diseases are summarised from those published in the Weekly Returns, adjusted in respect of any returns or corrections received too late for insertion in that series.

Note—The returns for the quarters ending 30th June and 31st December contain lists of the changes of boundaries of administrative areas during the six months ending on these dates (*see* Table IX) while summaries of certain figures for the year are published in the December and March quarter issues (*see* Table X).

QUARTERLY DEATHS BY CAUSE DURING 1940-1942.

An appendix table (pages 5 and 8) shows the deaths of males and females from 36 selected causes, registered during each quarter of the years 1940 and 1941 and March, June and September quarters of 1942. This series is to be continued quarter by quarter in future Returns. Corresponding figures for each quarter of 1938 and 1939 were given in the Return for the March quarter of 1941.

NOTES ON THE FOURTH QUARTER OF 1942

ENGLAND AND WALES.

Births.

The birth rate, based upon the total population of England and Wales as at Mid-1939, was 15.4 per 1,000 and was the highest fourth quarter rate recorded since 1930. It compares with 13.9 in the fourth quarter of 1941. In the five years prior to 1941 the average rate for the fourth quarters was 13.6.

Of the births registered 82,182 were males and 78,497 females, a proportion of 1,047 males to 1,000 females; the average for the 10 preceding fourth quarters being 1,053.

The number of illegitimate births, included in the total, was 8,474 which was 934 more than in the fourth quarter of 1941.

The 5,467 stillbirths represent 3.3 per cent. of the total births registered.

Deaths.

The death rate based upon the Mid-1939 population was 11.0 per thousand and was the same as that for the fourth quarter of 1941. In the five years prior to 1941 the average rate for the fourth quarters was 12.3.

Of the deaths registered 60,114 were males and 54,613 females, a proportion of 1,101 males to 1,000 females.

Infant mortality was 48 per 1,000 live births, 10 below the average of the 10 preceding fourth quarters and 1 below the low record reached in 1939. The deaths totalled 7,713. In the previous four quarters the rates were 57, 61, 47 and 40. The diarrhoea death rate under 2 years of age was 5.9 per 1,000 live births (955 deaths) compared with 5.6, 4.9, 4.3 and 5.6 in the four preceding quarters.

There were no deaths from small-pox registered during the quarter but one case was notified as occurring in Hampstead Met. B., London Ad. Co.

Natural Increase or Decrease.

The births registered exceeded the deaths by 45,952. The corresponding increases (+) or decreases (−) in the fourth quarters of 1939, 1940 and 1941 were +18,898, −8,009 and +30,145, respectively.

Marriages.

The 166,784 persons married in the quarter were 27,732 less than in the fourth quarter of 1941, and were 39,492 lower than the average for the fourth quarters of the five years prior to 1941. The corresponding rate, namely, 16.0 persons married per 1,000 population, is lower than any fourth quarter rate recorded since 1932.

UNITED KINGDOM AND EIRE.

205,552 births and 144,510 deaths were registered in the quarter, representing a natural increase of 61,042. The number of persons married is not yet available. (*See* the Returns published by the respective Registrars-General for Scotland, Northern Ireland and Eire.)

(Notes continued on page 12.)

DEATHS (excluding Stillbirths).											

(a) Provisional.

(b) Provisional rates based upon Mid-1939 population. Changes in the total population since 1939 are not sufficient to invalidate these rates to any serious extent.

(c) Note.—An exceptional number of marriages are celebrated at Easter and the sequence of quarterly marriage totals is accordingly influenced by fluctuations, as between the 1st and 2nd quarter, of the position of Easter. The following shows the date of Easter Sunday in each year of record.

1932	1933	1934	1935	1936	1937	1938	1939	1940	1941	1942
27th March	16th April	1st April	21st April	12th April	28th March	17th April	9th April	24th March	13th April	5th April

(d) In addition to these numbers 167 deaths were registered in 1938 and 98 in 1939 which occurred in the Gresford Colliery disaster in 1934.

TABLE III suspended.

TABLE IX.—CHANGES IN BOUNDARIES, NAMES, ETC., OF BOROUGHs, URBAN DISTRICTS AND RURAL DISTRICTS DURING THE SIX MONTHS ENDED 31ST DECEMBER, 1942.

No changes of boundaries occurred during the six months ended 31st December, 1942.

Notes continued from page ii.

SUMMARY FOR ENGLAND AND WALES, 1942.

The excess of live births over total deaths (registered in England and Wales) was 175,168. The corresponding excess for the preceding year was 52,048, and the average annual natural increase for 1936-1940 was 99,585.

Provisional rates per 1,000 population as at mid-1939 were as follows:—Persons married 17·8; live births 15·8; Total deaths 11·6. Stillbirths were 33 per 1,000 total births and illegitimate live births 54 per 1,000 total live births. Infant mortality was 49 per 1,000 live births.

The birth-rate was 1·6 above the low rate reached in 1941 and was the highest recorded since 1931. The death-rate was 1·3 below that of 1941 and the same as that for 1938 which was the lowest since 1930. Infant mortality was the lowest recorded, being 1 per 1,000 below the previous lowest in 1939. The proportion of stillbirths to total births was the lowest recorded but the illegitimacy rate amongst live births was 10 per 1,000 above the average for the preceding five years.

The marriage-rate was 0·9 below that of 1941.

SUMMARY FOR THE YEAR 1942

TABLE X.—MARRIAGES, BIRTHS AND CIVILIAN DEATHS (AND DEATHS OF INFANTS UNDER 1 YEAR) registered in the year 1942 (calendar year).
